Doncaster
Clinical Commissioning Group

In Doncaster, we're making it easier and more convenient for you to access primary care services. Many people use their mobile phone and electronic devices on the go to look up information, make reservations and purchase goods. This is why we are following the same trend and making as many local health services accessible and bookable online.

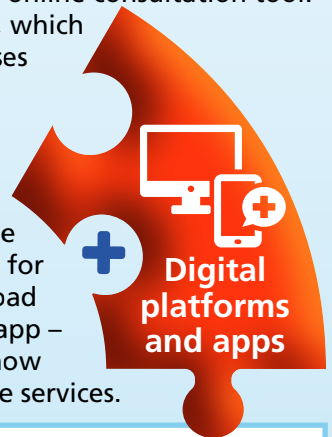

Did you know...

- You can **book a GP or nurse appointment online**? All local practices in Doncaster offer this service – so you can book an appointment on the go, 24 hours a day
- **Repeat prescriptions can be ordered online**? If you take prescribed medication, speak with your local practice about ordering your prescriptions online. You can even specify which local pharmacy you would like to use so that you can go directly to the pharmacy to pick up your prescription items
- You can **review your care record online**. This service is available to all patients – ask your local practice if you can't see your notes online.

By summer 2020, all patients in Doncaster will be able to access symptom checking, lifestyle advice and signposting through an online consultation tool. This tool will direct you to the most appropriate care, which could be either self-care, pharmacies, or in urgent cases 999, or a GP appointment if appropriate.

Online consultations will make it even easier for you to access the right local primary care services.

We're also making it even easier for you to choose the right service, working towards a single preferred app for primary care services in Doncaster. Until then, download the **Doncaster Choose Well** app – providing all you need to know about local health and care services.
